This report is	hull seemed to b or welded. No a radio bearings o about two m long painted on the s On the fore and on the side of the possible entrance observed and one to be about 70 m marine was moored.  ENCLOSURE (A):	e and had much the same appearance quite smooth with no visible juntennae or wires could be observed to top of the conning tower. On the condition of the conning tower was streamly after ends of the tower was streamly after ends of the tower were gunder to the submarine. On top of the frame for radio bearings. The left is a tender.  LISRAR - end - Sketch of New Type Submarine  361.5 N	e as type U 3515. The notions, either riveted i except a frame for me foredeck was a bulb, bulb had a white rectangle ined but not extremely so. turrets but no visible guns. As seemed to be the only e tower one periscope was ength of the ship was assumed rlag was observed. The sub-	
without the co	hull seemed to b or welded. No a radio bearings o about two m long painted on the s On the fore and on the side of the possible entrance observed and one to be about 70 m marine was moored.  ENCLOSURE (A):	e and had much the same appearance quite smooth with no visible juntennae or wires could be observed to top of the conning tower. On the cone m high and one m wide. The ide of it. The tower was streamly after ends of the tower were gun is to the submarine. On top of the frame for radio bearings. The left is a tender.  LISRAR  - end -  Sketch of New Type Submarine	e as type U 3515. The notions, either riveted i except a frame for me foredeck was a bulb, bulb had a white rectangle ined but not extremely so. turets but no visible guns. As seemed to be the only tower one periscope was ength of the ship was assumed flag was observed. The sub-	
without the co	hull seemed to b or welded. No a radio bearings o about two m long painted on the s On the fore and on the side of the possible entrance observed and one to be about 70 m marine was moored.  ENCLOSURE (A):	e and had much the same appearance equite smooth with no visible juntennae or wires could be observed not op of the conning tower. On the conting tower was streamly after ends of the tower was streamly after ends of the tower were gunded to the submarine. On top of the tothe submarine. On top of the frame for radio bearings. The left is a tender.  LISRAR - end -  Sketch of New Type Submarine  361.5 N	e as type U 3515. The notions, either riveted i except a frame for me foredeck was a bulb, bulb had a white rectangle ined but not extremely so. turets but no visible guns. As seemed to be the only tower one periscope was ength of the ship was assumed flag was observed. The sub-	
without the co	hull seemed to b or welded.
